## PROJECT EXPERIENCE

**Senior Project (Academic Project – Team)**                    08/2020 – 05/2021
*Website for the Western Monroe Historical Society*
- The MVP (minimum viable product) for my team was developed from conversations with the project sponsor and previous senior project team
- Used Java Spring Boot for developing back end, React JS to develop the front end, PostgreSQL for the management of teams database.
- Practiced Scrum development methodology, weekly stand-ups, bi-weekly sprints managed on Trello, bi-weekly retrospectives after every sprint, backlog prioritization with project sponsor at start of each sprint

## CO-OP EXPERIENCE

**Paychex (Co-Op - Software Engineering Intern)**              01/2020 - 08/2020
*Added to the Back-End Application Used by Paychex's Employees*
- Made vital changes to the scripts and micro-services used by other software engineers at Paychex
- Worked on a service that would parse tables for "bad data"
- Used MySQL for the database and used Java for the service development
- Backend team used AGILE methodology; therefore, this team would have to shift focus when necessary and be able to comply to different requirements; participated in stand-up meetings every other day and weekly sprint planning/analysis meetings

## OTHER WORK EXPERIENCE
